## SEASONED DENTIST OPENS PRIVATE PRACTICE IN SOUTH FLORIDA

*Dr. Camille Dixon Opens the Florida Denture Institute*

FORT LAUDERDALE, Fla. – August 26, 2009 – After more than a decade of working in general dentistry, Dr. Camille Dixon has opened a dental practice in Lighthouse Point, Fla. Named to reflect her area of focus, the Florida Denture Institute (FDI) offers expertise in a range of denture making methods, including the revolutionary Turbyfill Denture Technique. FDI is the only South Florida dental group to offer this advanced denture process.

“ I am pleased to open the Florida Denture Institute and focus in an area that employs this innovative technique for quality dentures,” said Dr. Dixon, owner, FDI. “Florida is a state where mature adults and retirees settle. Although dentures are not age exclusive, these residents are the primary candidates for the quality dentures our institute offers.”

Prior to opening FDI, Dr. Dixon trained with the pioneer and developer of the Turbyfill Denture Technique, Dr. Walter F. Turbyfill. Dr. Dixon invested time in training with Dr. Turbyfill to offer her patients a higher quality denture product. The Turbyfill technique provides patients with the most precise denture fit available and eliminates any problems associated with dentures, including clicking, slipping, gum irritation, and poor fit.

Since graduating from the University of Florida College of Dentistry in 1996, Dr. Dixon has practiced general dentistry. Her new practice, the Florida Denture Institute, is located at 2211 NE 36<sup>th</sup> Street (Sample Rd.) Suite 102, Lighthouse Point, Fla. For more information, visit [www.FloridaDentureInstitute.com](http://www.FloridaDentureInstitute.com) or call 954.788.7101.

### **About Florida Denture Institute**

A new dental practice focusing in dentures, the Florida Denture Institute (FDI) is the only group to launch and offer the Turbyfill Denture Technique. FDI was founded by Dr. Camille Dixon, a seasoned dentists who has trained with the developer of the Turbyfill Technique, Dr. Walter F. Turbyfill. In addition to this revolutionary technique, FDI specializes in implant-related overdentures, hybrid dentures, and partial dentures.

### **About the Turbyfill Denture Technique**

The Turbyfill Denture Technique was begun more than a half-century ago by Dr. Earl Pound and perfected by Dr. Walter F. Turbyfill. This technique is the only method to take into consideration and utilize all the functions of the teeth – speech, mastication and facial shaping – in the denture fitting process.
